FIFO PAGE REPLACEMENT

Aim:

To find out the number of page faults that occur using First-in First-out (FIFO) page replacement technique.

Algorithm:

1. Declare the size with respect to page length
 2. Check the need of replacement from the page to memory
 3. Check the need of replacement from old page to new page in memory 4.
- Form a queue to hold all pages
5. Insert the page require memory into the queue
 6. Check for bad replacement and page fault
 7. Get the number of processes to be inserted
 8. Display the values

Program Code:

```
#include <stdio.h>

int main() {
    int frames, pages, i, j, k; Page-faults = 0;
    printf("Enter no. of frames: ");
    scanf("%d", &frames);
    printf("Enter no. of pages: ");
    scanf("%d", &pages);
    int incoming[pages], temp[frames];
    printf("Enter page reference string: ");
    for (i = 0; i < pages; i++) {
        scanf("%d", &incoming[i]);
    }
    for (i = 0; i < frames; i++) {
        temp[i] = -1;
    }
}
```

```
printf ("In Page 1 & Frame 1 & Frame 2 & Frame 3 & Page Faults\n");
```

```
for (i=0; i < Pages; i++) {
```

```
    int found = 0;
```

```
    for (j=0; j < frames; j++) {
```

```
        if (temp[j] == incoming[i]) {
```

```
            found = 1;
```

```
            break;
```

```
        }
```

```
    if (!found) {
```

```
        temp[Page - faults % frames] = incoming[i];
```

```
        Page - faults++;
```

```
    }
```

```
    printf ("%d \t", incoming[i]);
```

```
    for (k=0; k < frames; k++) {
```

```
        if (temp[k] != -1)
```

```
            printf ("%d \t", temp[k]);
```

```
        }
```

```
    }
```

```
    printf ("%d \n", found ? 0 : 1);
```

```
    }
```

```
printf ("In Total Page Faults: %d\n", Page - faults);
```

```
return 0;
```

```
}
```

Sample Output:

```
[root@localhost student]# python fifo.py
```

```
Enter the size of reference string: 20
Enter [ 1]: 7
Enter [ 2]: 0
Enter [ 3]: 1
Enter [ 4]: 2
Enter [ 5]: 0
Enter [ 6]: 3
Enter [ 7]: 0
Enter [ 8]: 4
Enter [ 9]: 2
Enter [10]: 3
Enter [11]: 0
Enter [12]: 3
Enter [13]: 2
Enter [14]: 1
Enter [15]: 2
Enter [16]: 0
Enter [17]: 1
Enter [18]: 7
Enter [19]: 0
Enter [20]: 1
```

```
Enter page frame size : 3
```

```
7 -> 7 - -
0 -> 7 0 -
1 -> 7 0 1
2 -> 2 0 1
0 -> No Page Fault
```

```
3 -> 2 3 1
0 -> 2 3 0
4 -> 4 3 0
2 -> 4 2 0
3 -> 4 2 3
0 -> 0 2 3
3 -> No Page Fault
2 -> No Page Fault
1 -> 0 1 3
2 -> 0 1 2
0 -> No Page Fault
1 -> No Page Fault
7 -> 7 1 2
0 -> 7 0 2
```

1 -> 701

Total page faults: 15.

[root@localhost student]#

Enter no. of frames: 3

Enter no. of pages: 12

Enter page reference string: 1
